

ABHIJEETH PANDEY. P

AI/ML Engineer (Student) | Chennai, India

📞 +91-8925370949 | ✉️ abhijeethpandey2@gmail.com |  [Linkedin](#) |  [Github](#)

SUMMARY

AI/ML engineering student specializing in NLP and GenAI systems with hands-on experience building end-to-end machine learning pipelines and RAG-based applications. Proven ability to design, evaluate, and deploy ML and GenAI systems in real-world environments. Seeking AI/ML Intern or Junior ML Engineer roles in startup-focused teams.

EDUCATION

Sathyabama Institute Of Science and Technology
B.E - CS with AI/ML Specialization - CGPA - 7.82

10/2022 - 06/2026
Chennai, Tamil Nadu

PROJECTS

NLP ML Pipeline – End-to-End Text Classification System

- Built an end-to-end ML pipeline for spam detection on an imbalanced dataset (5,500+ samples), covering preprocessing, feature engineering, training, and evaluation.
- Implemented TF-IDF and classical ML models, achieving **0.91 precision, 0.91 recall, and 0.91 F1-score**, with detailed error analysis using confusion matrices.

RAG Document Assistant – Context-Aware AI Q&A System

- Developed a Retrieval-Augmented Generation (RAG) system for semantic search and question answering over PDF documents.
- Implemented document chunking, embedding generation, and vector-based retrieval using FAISS, enabling context-aware responses.
- Integrated a local LLM and built real-time APIs using FastAPI for low-latency, grounded answers

AI-Driven Learning Platform with RAG Chatbot

- Built an AI-powered LMS to reduce student dropouts by integrating a voice-based conversational assistant, adaptive quizzes, and automated handwritten answer evaluation.
- Designed and implemented a **RAG-based chatbot** for contextual Q&A over custom educational content using embeddings and semantic retrieval.
- Developed scalable backend services using **FastAPI** and integrated multiple LLM pipelines, with a Flutter-based mobile frontend.

PUBLICATIONS

- AR-CITIZEN: AI-Powered AR Civic Engagement Platform
Published in IEEE Xplore, Proceedings of IC-ICNS 2026
Authors: Abhijeeth Pandey, Aavesh Khan, Sonia Jenifer Rayen
DOI: 10.1109/IC-ICNS68863.2026.11537871.

SKILLS

Programming: Python, C++, C#

ML/NLP: scikit-learn, TF-IDF, text preprocessing, embeddings, RAG pipelines, model evaluation

GenAI : Hugging Face, LangChain, Ollama

APIs & Backend: FastAPI, REST APIs

Data & Tools: Pandas, NumPy, SQL, Git, Docker

ACHIEVEMENTS/AWARDS

- * 1st Place – Hackathon SIST 2024
- * 1st Place – Abhisarga'25 @ IIIT Sri City
- * Prize Winner – INVENTE 2023
- * Nominated for Smart India Hackathon 2023 & 2024
- * Winner – Hack-n-Droid @ VIT Chennai
- * Published research paper "AR-CITIZEN: AI-Powered AR Civic Engagement Platform" in IEEE Xplore (IC-ICNS 2026)
